

Minimum Data Requirements for Successful Import of Patients to Treat

All data fields that wish to be imported must be included in the import file

- Only a small subset (patient) of fields must contain valid data values
 - firstName
 - lastName
 - dateOfBirth
 - street
 - city
 - state
 - zip
 - weight - **Mandatory for patients 12 years of age or younger**, otherwise, this value is not required for patient importing
 - weightunits - Only required if a weight value is included for a given patient

The remaining fields do not require values to be passed during import – except for those outlined above. See the table below for each attribute description and values

Patient Import Minimum Import Data Values Required

Only these fields/attributes require valid data values during import

Reference	Attribute Name	Description	Sample Value
Patient	firstName	Patient First Name	Joe
Patient	lastName	Patient Last Name	Bravado
Patient	dateOfBirth	Date of Birth (MM/DD/YYYY)	4/25/50
Patient	street	Street address Do not use special characters: <^&%\$#@!~.*\	312 Clematis St, Number 301
Patient	city	City	West Palm Beach
Patient	state	State Abbreviation (USPS Standards)	FL
Patient	zip	5-digit zip code USPS Look Up a Zip Code	33401
Patient	weight	Patient Weight – mandatory for patients <=12 years old	125
Patient	weightunits	"lbs" or "kg" – mandatory for patients <=12 years old	lbs

The full list of importable data fields available for Treat may be found in the [Patient Import Reference](#).
